Planning within Complex Urban Systems

Planning within Complex Urban Systems

Shih-Kung Lai, Tongji University, China

Series: Routledge Research in Planning and Urban Design

This book introduces the axiomatic/experimental approach to urban planning and addresses the criticism of the lack of a theoretical foundation in urban planning. With the rise of the complexity movement, the book is timely in its depiction of cities as complex systems and explains why planning from within is useful in the face of urban complexity. It also includes policy implications for the Chinese cities in the context of axiomatic/experimental planning theory.
